PROFILE SUMMARY

Computer Science undergraduate and founder building at the intersection of AI, embedded vision, and software engineering. Founder of Elsheph Systems, with ventures including synth, Atlitos, and Benji. Recognized as Best Innovator at Texas State University (2025) and Runner at the ISF Unicorn Global Summit, Dubai (2026). Known for shipping end to end products from hardware integration to AI pipelines to user-facing applications. Passionate about technology for community development through training youth in his hometown and entrepreneurship leadership at IEEE TEMS Society and LaunchPad ISF SRM.

EDUCATION

B.Tech, Computer Science & Engineering (Core)
SRM Institute of Science & Technology, Kattankulathur (2023 to 2027, Expected)
Relevant Coursework: Design & Analysis of Algorithms, Machine Learning, Quantum Computation, Computer Networks, Computer Graphics, Embedded Systems.
Visiting Student, Startup Semester (SCET)
University of California, Berkeley (Jan 21 to May 15, 2026) | Overall grade: A+
Relevant Coursework: SportsTech 183, PM 2026, Launching Consumer Packaged Good Startups from 0→1, A. Richard Newton Lecture Series, Amazoogole.

INTERNATIONAL EXPERIENCE

ISF Unicorn Global Summit, Dubai (2026)

- Selected as SRM IST delegate; pitched to a global jury of investors, founders, and CXOs.
- Led customer discovery and go to market story; showcased product demo, roadmap, and early traction in a timed pitch and Q&A.
- Runner, Summit Pitch Finals; recognized for problem solution fit, clear metrics, and execution plan.

ISF Unicorn Program, Texas State University, San Marcos, TX (2025)

- Shortlisted and sponsored by the International Startup Foundation to present at the Unicorn Global Conference.
- Delivered a keynote presentation to an audience of over 300 global CEOs, CXOs, and investors.
- Engaged with industry leaders across Dallas, Austin, and Houston to explore global partnerships.
- Best Innovator Award.

National University of Singapore, SoC Summer Workshop (2025)

- Designed and built an AIoT Air Hockey Assistant in a multicultural team of four: sensor-driven goal detection, BLE scoreboard, analytics.
- Contributed to system design, BLE and Raspberry Pi integration, scoring logic, and UI prototype.
- Second Prize Overall among 40+ international teams in the Artificial Intelligence of Things course (Certificate signed by Dr. Tan Tiow Seng).

STARTUP EXPERIENCE

Founder & CEO, Elsheph Systems | Jan 2024 to Present

- Product development and IT staffing organization focused on custom software solutions for clients.
- Training and employing young members from Andhra Pradesh, building a grassroots talent ecosystem in software engineering and AI.
- Current projects include an E-Book Platform inspired by Speechify with custom voice synthesis and reader personalization, and a tourism app for Israel: a tour guide tracking and communication tool for senior travelers.

Founder & CEO, SynthSports | 2026 to Present

- Sports data synthesis platform unifying fragmented coaching tools into one dashboard.
- Architected web and iOS clients with a shared Supabase backend and Claude-powered AI synthesis layer.
- Won UC Berkeley SportsTech 183 class final. Most Innovative Technology, Collider Cup XVIII. Accepted into Berkeley SkyDeck Pad-13 (Batch 22).
- Submitted to YC S26.

SIDE PROJECTS

Atlitos | Jan 2025 to Present

- AI-powered sports super-app for athletes, coaches, and academies.
- Combines academy management, AI coaching, and performance analytics into a gamified ecosystem.

Benji | 2025 to Present

- POV-first AI tennis coaching on Ray-Ban Meta smart glasses. Built end to end embedded vision pipeline: on-device pose detection (40/40 frames on benchmark),
- TrackNet ball tracking, biomechanics-grounded technique grading, and real-time audio feedback through the glasses speaker. Integrated with Meta's DAT SDK.

GMV Live | 2026 to Present

- Marketplace connecting TikTok Shop brands with live shopping hosts. Built and shipped the full platform end to end: booking, escrow payments, and real-time session analytics.
- 2nd Place and People's Choice, Collider Cup XVIII. Advanced to Berkeley SkyDeck Pad-13 (Batch 23).

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript (React/Next.js), Swift

Frameworks: Spring Boot, React Native, SwiftUI, FastAPI, Next.js

Databases: Supabase (PostgreSQL), MongoDB, Redis, pgvector

AI/ML: Pose Detection, Ball Tracking (TrackNet), Computer Vision Pipelines, NLP, AR Feedback Systems

Embedded/IoT: Raspberry Pi, BLE, Ray-Ban Meta DAT SDK, on-device inference

Tools: Figma, Cursor, Claude Code, AWS, Firebase, GitHub, Razorpay

LEADERSHIP & COMMUNITY

- Chairman, IEEE TEMS SRM Chapter (2024 to Present): leading entrepreneurship and innovation initiatives bridging technology and management.
- Secretary, LaunchPad SRM (2025 to Present): managing operations and mentorship for student founders and university startup programs.
- Pre Incubatee of **Bootstrappers Research Council** SRM.

- ISF Unicorn Global Fellow: represented India's youth innovation community on an international platform.

**CERTIFICATIONS
& ACHIEVEMENTS**

- Berkeley Skydeck Pad-13, Batch 22 (2026)
- Berkeley Skydeck Pad-13, Batch 23 (2026)
- 4th Place, Most Innovative Technology, Collider Cup XVIII, UC Berkeley (2026).
- 2nd Place, People's Choice, Collider Cup XVIII, UC Berkeley (2026).
- Runner, Summit Finals, ISF Unicorn Program, Dubai Innovation Summit (2026).
- Best Innovator Award, ISF Unicorn Program, Texas State University (2025).
- National University of Singapore, Certificate of Achievement, Second Prize, AIoT Course (2025).
- MIT Lincoln Laboratory, Beaver Works Summer Institute, Mini-RACECAR Online Course, Certificate of Completion (Aug 17, 2022).
- Harvard Student Agencies (HSA Tutoring), Entrepreneurship Program (2020).

**HOBBIES &
INTERESTS**

- Playing tennis, badminton, pickleball, squash, table tennis, and soccer.
- Learning guitar.
- Watching podcasts and interviews.
- Exploring new places.
- Mentoring young students and entrepreneurs.
- Faith-based personal growth.
